Professional Summary

MCA graduate with hands-on experience developing full-stack web applications using React.js, Next.js, FastAPI, Node.js, and PostgreSQL. Strong foundation in Python, JavaScript, SQL, Data Structures and Algorithms, REST APIs, and software development principles. Experienced in building AI-powered applications and passionate about solving real-world problems through technology.

Education

MCA – Master of Computer Applications (Cyber Security) Feb 2024 – Dec 2025
Mangalore Institute of Technology and Engineering, Moodbidri
CGPA: 8.59

BCA – Bachelor of Computer Applications Oct 2020 – Oct 2023
MPES's SDM Degree College, Honnavar
CGPA: 8.34

Technical Skills

- **Languages:** TypeScript, JavaScript, Python, SQL
- **Front-End:** React.js, Next.js, Tailwind CSS, HTML, CSS
- **Back-End:** FAST API, REST API Design, Node.js
- **Databases:** PostgreSQL, MySQL
- **Version Control:** Git, GitHub
- **Cloud:** Microsoft Azure Fundamentals
- **Deployment:** Vercel

Soft Skills

Communication, Teamwork, Problem-solving, Adaptability, Time Management

Internship

Front-End Development Intern Nov 2024 – Feb 2025
Dyashin Technosoft Pvt. Ltd., Bangalore
github.com/Kavyanaik07/Resume-Builder

- Developed a Resume Builder web application using React.js, JavaScript, HTML, and CSS, featuring reusable components and responsive layouts.
- Implemented an ATS score checker that compares resume keywords with job description requirements and generates a matching score.
- Built a real-time resume preview that updates dynamically as users enter or modify their details.
- Tested and debugged application features to identify and resolve functionality issues.
- Used Git for version control and collaborated with team members during development.

Projects

thisWay — AI Travel Planner (Full-Stack AI Application)
Live Demo | github.com/Kavyanaik07/ai-trip-planner

- Developed thisWay, a full-stack AI Travel Planner using Next.js, TypeScript, FastAPI, and PostgreSQL, with deployment on Vercel.
- Integrated Google Gemini AI to generate personalized travel itineraries based on user preferences and constraints, and implemented an AI chatbot for trip-planning assistance.
- Implemented PDF export functionality, allowing users to download their generated travel itineraries.
- Designed and implemented REST APIs for trip planning and itinerary management, integrated Google OAuth authentication, and used Supabase PostgreSQL for data storage.
- Integrated Leaflet.js and OpenStreetMap to visualize travel destinations and support map-based trip planning.

Certifications

- Microsoft Azure Fundamentals (AZ-900) (Udemy) Aug 2026

Research & Publications

IntelliBugtrack: Bug Tracking Using AI Nov 2025
4th International Conference on Advances in Science, Engineering & Technology (ICASET 2025)

- Published and presented an AI-based bug tracking framework at an international conference.
- Proposed AI-driven approaches for automated bug classification and prioritization.
